

pH11+ PLUS

Fully boost soil efficiency

The Best Soil Improver for Organic Plantations

Premium Grade,
High Quality

“Stop Global Warming, Build the quality of Human Life
by use of natural TPI Organic fertilizer.”

Product Characteristics

PH11+ is a product of high quality and concentrated natural minerals. It contains various profitable minerals, such as calcium and magnesium carbonate more than 85 percents of its content; as well as other profitable natural minerals for plant growth such as Silica.

PH11+ solves the problem of soil acidity quickly, decreases toxicity accumulated in the soil and improves the soil's suitable characteristics for plants' growth.

PH11+ contains high content of Calcium Carbonate which improve the product's efficiency and provide profitable nutrients that boost plants' immunity.

Usage

1. For soil preparation: apply the product at the rate of 100-200 kgs. per 1,600 square meter (0.4 acre) or proportionately to the soil acidity.
2. For planting hole preparation: apply the product as foundation for planting hole, at the rate of 2-5 kgs per 1,600 square meter (0.4 acre); in order to boost plants' root system
3. For increasing profitable minerals for plants' growth in the field
 - ▶ pH 5 – 6 : 100 kgs per 1,600 square meter (0.4 acre)
 - ▶ pH 4 – 5 : 200 – 300 kgs per 1,600 square meter (0.4 acre)
 - ▶ pH < 4 : 500 - 1,000 kgs per 1,600 square meter (0.4 acre)

For better effect, use this product in conjunction with TPI Tablet Organic Fertilizer

Profits

1. Alleviate soil toxicity and acidity through fine granular material that acts rapidly
2. Preserve the balance of soil's pH value at appropriate level for plants' growth
3. Decrease accumulation of disease and infestation in plants
4. Improve plants' health, strength and immunity
5. Restore the field

Organic,
environmentally friendly

Caution

- Store in a cool and dry place, or cover with water- or humidity-proof materials
- Use the entire content of the bag within 1 month after first usage
